Technical Skills and Competencies

Proficient in HTML, CSS, Java, JavaScript, SQL, WordPress, Figma and Photoshop. Continuously enhancing skills through hands-on practice and learning.

About me in 23 seconds

In my youth, I studied recorder, clarinet, and piano. I learned to ride a unicycle and perform various trampoline stunts. Later, in my adult life, I started taking Brazilian Jiu-Jitsu lessons at my local dojo. More recently, I found refuge in the world of speed-cubing. While memorizing hundreds of algorithms, I found the courage to begin my career change into software development.
